

### Bestselling Products

# Magento Extension User Guide

Showing your best products to the customers can help you enhance your selling and the latest trend in the market. We are launching this extension which will let you display your best selling products in the easiest and effective way to your online store.

This extension can display best selling products date wise. If you want to add any best seller products from date to current date, then we can easily show that best seller product with this extension.

This extension shows bestselling products in any of the page as well as in left sidebar and right sidebar. Overall this extension has a good feature which is different from other extensions.

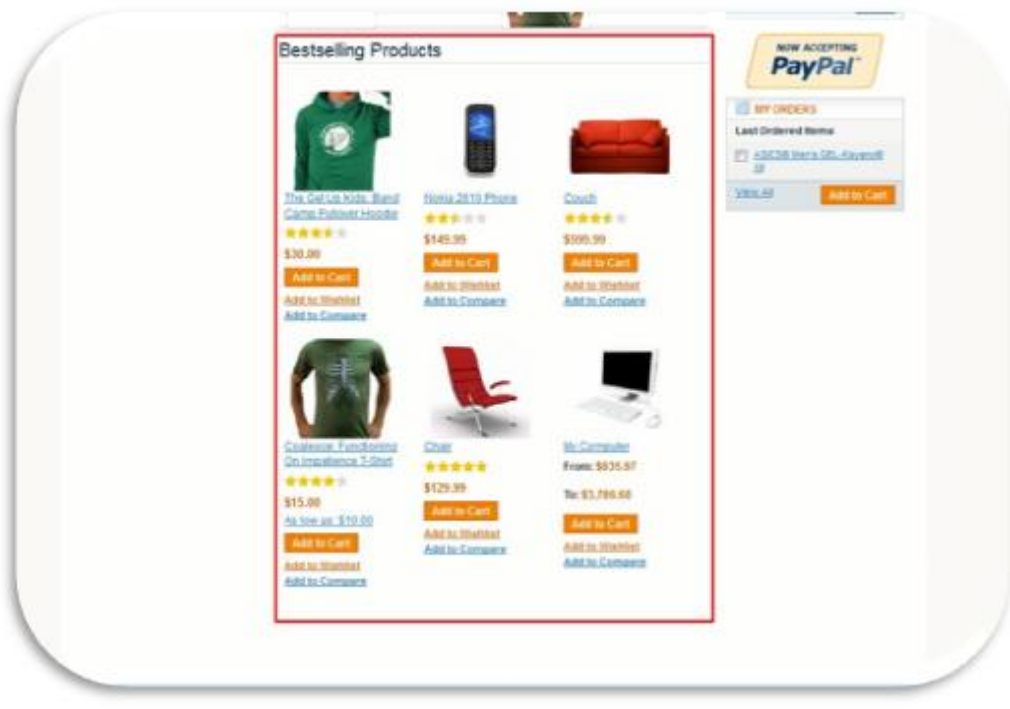

This Extension also provides the maximum limit to show best seller products on the front end. This Extension is very easy to install and configuration.

**Features:**

- 1) Intensify Online Selling
- 2) Easy to install
- 3) Specify the number of items to be shown in a row
- 4) Facility to change the header name
- 5) Display your best selling products date wise
- 6) Option to display your product price in the product listing
- 7) Option to show the ratings on the product listing page
- 8) Option to add to cart button in the product listing
- 9) Option to add to wish list link in the product list
- 10) Option to add to compare the link in the product list

- 11) Working with a maximum limit to show best seller products on the front end.
- 12) Facility to display your products on any page as well as the facility to display the products on right or left sidebar. Kindly paste the following code

```
{{block type="bestseller/bestseller" template="bestseller/bestsellers.phtml"}}
```
