

Sale Restrictions Extension User Guide

## **Sale Restrictions Extension**

### **Benefits of “Sale Restrictions” Extension for Magento:**

- During buyer visit to your eCommerce, when a buyer tries to buy the products which are under Sale Restrictions in that particular territory, it is always an embarrassing condition for both the buyer and the eCommerce Store owner. Hence, with the “Sale Restrictions” extension for Magento, you can now stop receiving sales and shipping requests from the buyers belonging to the states where you are not selling your products.
- “Sale Restrictions” extension for Magento allows you to restrict or select every single or different product to be labeled as “Sale Restrictions” in the selected states in the USA.
- You can also configure specific products rules when your customers are trying to make purchases from the selected states.

### **How to enable “Sale Restrictions” Extension for Magento functionality?**

- You can initiate with the first step with the Magento store administrator. You can apply the rules for the products which you don't intend to sell in particular territory from the admin panel.
- When a buyer makes a purchase, he is responded with “Sale Restrictions to state: XYZ” label on the shopping cart page. In spite of seeing this label, if he/she tries to place an order, he/she is reverted with a message that the ordered product cannot be shipped to a particular location.
- For example, as an admin, you have applied restrictions on the sale of XYZ product which will be restricted for sale in CA and FL. Now, if some customer attempts to buy a product from either CA or FL, he/she will be responded with a message that the desired products fall under the Sale Restrictions in the area he/she belongs to.
- The notification messages will be seen on “Add to Cart” and “Place an Order” pages.

### **How “Sale Restrictions” Extension for Magento will work?**

- First, as the admin, you will have to select the States you wish to Restrict from the admin panel.
- Once you are done with the filtering process, the products will not be sold in the selected states. Let us understand with an example:
- Suppose the admin has restricted/filtered particular product to be sold in the states- say CA (California) and FL (Florida) from the Admin panel. Hence, when a user tries to buy a product from this store and selects to ship the product's to CA or FL, the buyer will be immediately notified with a message that the selected products will not be shipped to CA or FL- the state the user has selected for shipping to a particular state.
- When the user traverses to the cart page, there will be the label like “Sale Restrictions to state: XYZ” under the added cart product.
- In the same way, on the checkout page, when the user clicks on “Place Order”, there will be a pop-up message notifying that the product cannot be shipped to a particular state.

### **“Sale Restrictions” Extension for Magento Features:**

- Multiple restrictions can be applied based on products, state and other shipping details.
- There are options to restrict particular customers, a group of customers to view the store.
- You can set a user-friendly name of rules.
- Multi-Store and multi-language are supported.
- Admin can block access to the store for a particular IP address, city, and state.
- The admin can redirect the visitor to a specific URL.

### **The advantages of installing “Sale Restrictions” Extension for Magento:**

- Stop unwanted traffic from the regions in which you are not selling your products.
- With “Sale Restrictions” extension for Magento, you are at ease to monitor the Blocked IPs, The Restricted States and the products in real-time.
