Product Video - How it Works

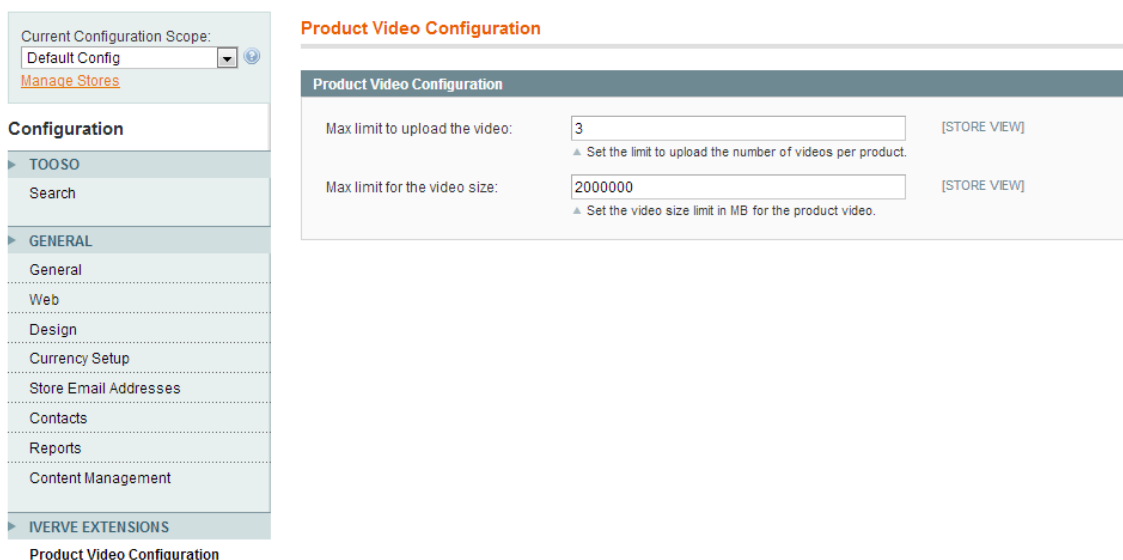

Product Video for Magento 1 has been always the most favorite extension because of two reasons:

- It is open source and free
- Helps to manage video for products with minimal settings.

Product Video is easy to use and user-friendly. Since you can install Product Video into your Magento 1 website, you can be making it working just by doing minimal settings it.

Admin Section will look like this:

Soon after installation, you will get “**Product video configuration**” tab as below.

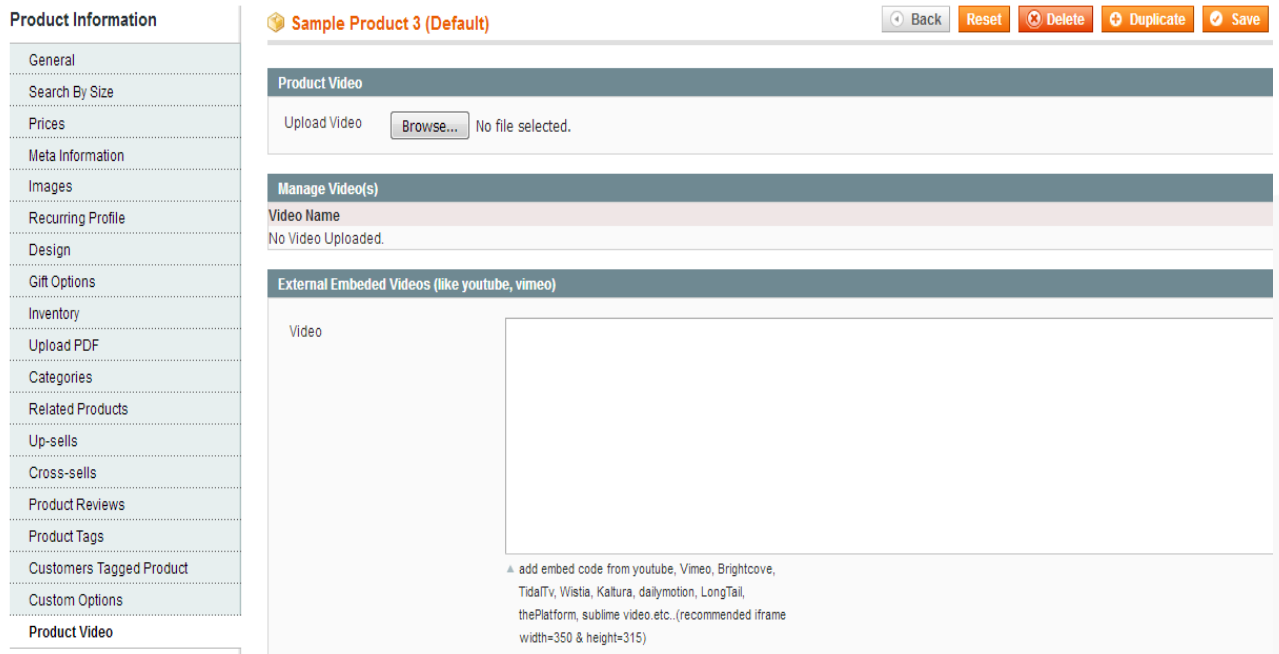

The screenshot displays the Magento Admin interface. On the left is a navigation menu with sections: Configuration, TOOSO, GENERAL, and IVERVE EXTENSIONS. Under IVERVE EXTENSIONS, 'Product Video Configuration' is selected. The main content area is titled 'Product Video Configuration' and contains two settings:

Product Video Configuration		
Max limit to upload the video:	<input type="text" value="3"/>	[STORE VIEW]
	▲ Set the limit to upload the number of videos per product.	
Max limit for the video size:	<input type="text" value="2000000"/>	[STORE VIEW]
	▲ Set the video size limit in MB for the product video.	

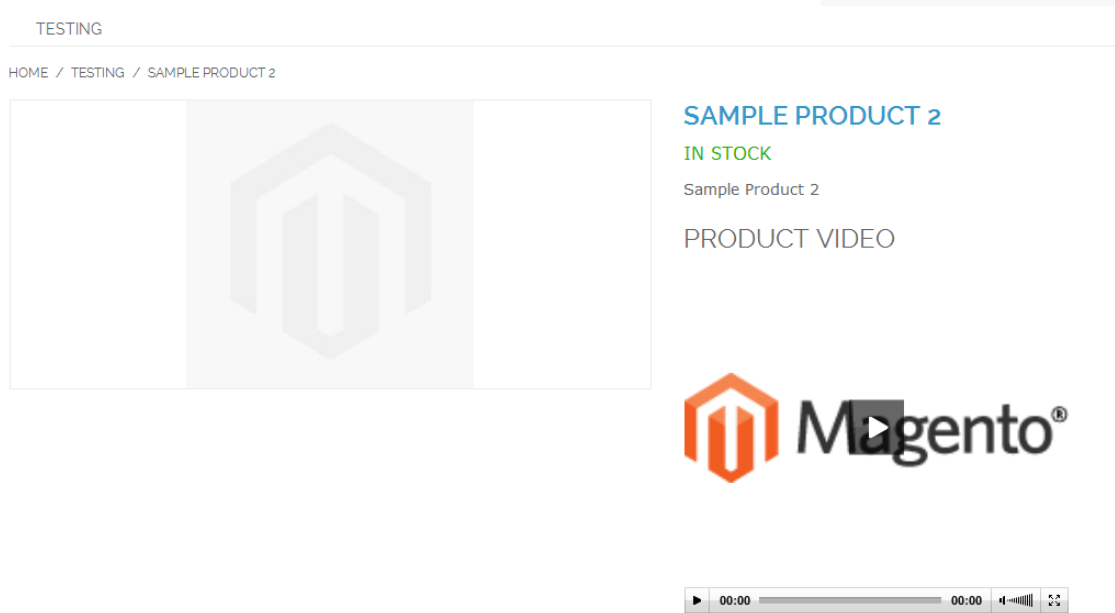

Here you can set “Max limit to upload the video”, “Max limit for the video size”.

Admin side product edits section.

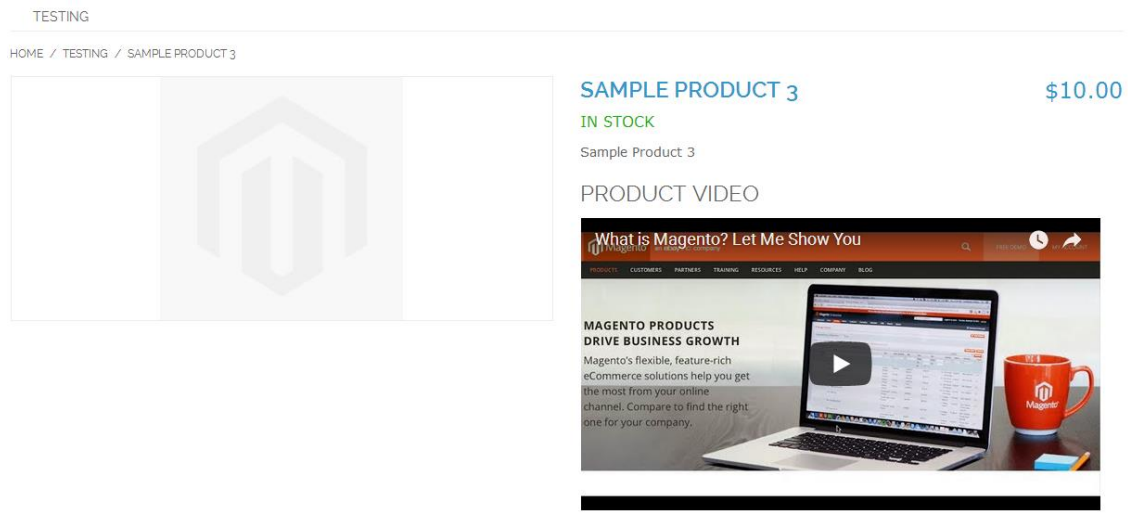

On Product edit page you will get “Product Video” tab so that user can upload video or add the embedded code of Youtube.

Frontend side product detail page view after video file uploads.
