Magento Extension User Guide

Search By Size – How its work?

Search By Size extension for Magento 1 has been always the most favorite extension because of two reasons:

- It is open source and free
- It provides facility to search by height, width and depth.

Soon after the installation of this extension, you will need to configure section as below.

This extension is based on “Width”, “Depth”, and “Height”. If this attribute is not created then we need to create it and assign to products.

The attributes should be “textfield” and “Use in Advanced Search” should be “Yes”.

Scope	<input type="text" value="Store View"/>
	<small>▲ Declare attribute value saving scope</small>
Catalog Input Type for Store Owner	<input type="text" value="Text Field"/>
	Type Should be Text Field
Default Value	<input type="text"/>
Unique Value	<input type="text" value="No"/>
	<small>▲ Not shared with other products</small>
Values Required	<input type="text" value="No"/>
Input Validation for Store Owner	<input type="text" value="None"/>
Apply To *	<input type="text" value="All Product Types"/>

Frontend Properties	
Use in Quick Search	<input type="text" value="No"/>
Use in Advanced Search	<input type="text" value="Yes"/> Use in advanced search should be Yes
Comparable on Front-end	<input type="text" value="No"/>

After that, we need to assign values for this attributes

Product Information

- General

Search By Size (Default)

Search By Size	
Width	<input type="text" value="10"/>
Depth	<input type="text" value="20"/>
Height	<input type="text" value="30"/>

In the admin section, we will get “search by sites” menu, under which we will found all 3 dropdowns which will contain all sizes. Admin can select a size which he wants to show in a drop-down frontend for search. Once admin will select these values and save then only it will display on the frontend.
